
Which package is right for you?

Silver is the package that lets us maintain your system during the hottest months and make sure that your plants are receiving optimal water.

Gold is our most popular package as it allows us to check your system monthly through the growing season to ensure optimal plant growth. We also monitor it through spring and fall when water requirements are much less thereby saving you money on your water bill.

Platinum is a great package for customers with high maintenance gardens and/or new plantings. Highly recommended for all new landscapes.

Did you know?

The cost of water is rising close to 10% each year. New advancements in timers and nozzles over the past few years make it possible to save approximately 40 to 50 percent on your irrigation water bill.

Now is the time to look at making your system as efficient as possible.

SPRING IRRIGATION 2016

Dear Client,

I'm hoping everyone is enjoying our warmer than usual winter, but it's time to think spring.

Our start-ups will commence April 18th and run through to May 13th. We will be booking morning and afternoon appointments. Kindly do your best to book your appointment as soon as possible to ensure a time that suits you. Keep in mind we may need access into your house.

Package clients will receive the savings of the HST if signed up before March 1st. This pricing does not apply to estate properties.

Thanking you in advance for a smooth spring season and your continued business.
